

General Construction:

Made from cold rolled steel, assembled by spot weld eliminating nuts, bolts, and rivets.

Padlock Hasp:

11 Ga

Hinge:

16 Ga full length piano hinge, welded to the frame and riveted to the door.

Frame:

16 Ga Uprights with three 90 degree bends for support and strength. Full length door stop on the left side of the frame. Ventilation holes on the door and its double panel. 18 Ga frame cross pieces.

Material:

Door:

16 Ga with full length 24 Ga inner panel. The bottom is flush with the lower frame cross piece.

Top: 24Ga

Bottom: 22Ga(Galvanized, sloped and perforated for draining)

Shelf: 22 Ga

Sides: 24 Ga

Back: 24 Ga

Accessories:

Number plates, bases, sloped tops and other accessories available.

Equipment:

Single tier lockers: one shelf and three hooks. Double tier lockers have two hooks per compartment. Hooks are 13/16" wide, curved on the end and made of 11 Ga material. Door is retained by a spring mechanism.

Paint Finish:

All parts are carefully degreased, cleaned and coated with a rust resistant phosphate solution, before the application of a generous coat of enamel paint. Paint is applied by an 'ELECTRO STATIC' procedure and baked at 325 degrees.
